Summary

Unity game developer with B.Tech in Computer Science (Game Technology) from Galgotias University, Specializing in building game and interactive systems in C#. Strong foundation in data structure and algorithm with hands on experience across game mechanics, tool development, and 3D asset creation in Blender.

Education

B.Tech in computer Science and Technology (Game Technology) 7.72 CGPA

Galgotias University- 2021-2025

Projects

Voxel Engine: Unity 6, C# - Seeded world generation using Perlin noise, custom vertex & compute shaders for real-time chunk rendering.

TCG Dice Board Game: Full prototype with card mechanics, dice rolling, board placement, and a charge/parity resource system in Unity.

2D Platformer: Built a 2d platformer game with movement, Health, animation sequence and enemies in a jungle theme.

Horror Game Prototype: A horror game project with Game design documentation and custom assets made using blender. Featuring a GDD with complete level design, enemy mechanics, and puzzle systems.

Role-based collaborative sheets: Built a web application using next-react and prisma orm. For real time collaborative sheets with audit history and version control with role-based access to the sheets

NLP flashcard Toolkit: Built a student focus NLP toolkit which summarizes the Notes into flashcard and allowed for self-testing by quiz questions from the notes.

Work Experience

IIT Roorkee- Feb-2026: present: Assisted in designing database schema and backend APIs for res summit 2026. Built Abstract submission page and admin panel for managing downloading of abstracts.
